

Simplicity is Power

Enterprise-Class Virtual IT
Anywhere, Anytime,
on Any Device

The Power of ONE!

The Power of ClubDrive is having ONE Superior, Simplified, High Performance source for Enterprise-Class IT at a fraction of the cost.

ClubDrive Virtual Enterprise IT Services:

Application/Data Virtualization: ClubDrive hosts and serves all of your software applications and data from the secure, high performance ClubDrive Enterprise Application Delivery Center. Users securely access their data and personalized application profile from *Anywhere, Anytime, on Any Device*. You eliminate the cost and hassle of maintaining servers. With no capital investment, users can securely access their customized applications and data from existing PC's, Mac's, and Mobile Devices. ClubDrive's Virtual Enterprise IT Service is always "right-sized" because you only pay for the number of users and applications needed. Because ClubDrive has the capability of serving over 25,000,000 applications, you can choose the software that best fits your needs.

Desktop Virtualization: Have a complete and secure desktop environment including operating system, applications and data delivered to your PC, Mac, Thin-client Terminal, or Mobile Device.

ClubDrive Additional Services:

Off-Site Data Backup: Have the peace of mind that your data is backed-up and protected in Enterprise-Class redundant facilities in separate geographic regions.

Rapid Recovery: Duplicate images of your servers are housed in the ClubDrive Enterprise Application Delivery Center ready to rapidly recover your business to its normal operations in the event of a catastrophic IT failure.

Internal/On-site Cloud: Leverage ClubDrive's deep virtualization experience to build a secure, high-performance internal cloud platform.

On-site IT Management: Let ClubDrive's experienced IT professionals manage your internal network resources.

Join the Club to get your business back to business, and get out of the IT business!
